Document

what is the final conclusion about dates, list all date facts, also list if there any more than one dates discussed but create a table and in the last column present most likely date for each event

table should go chronologically

The paper concludes that **there is no definitive resolution** to the chronology. The author argues that **both the 430-year and 215-year sojourn theories remain viable**, although he considers the **430-year Egyptian sojourn to be somewhat more realistic** because of the population-growth problem and the straightforward reading of the Hebrew Masoretic text. At the same time, he explicitly states that the evidence is insufficient to rule out the 215-year view.

📄 Pasted text

Below is a chronological summary of the principal dates discussed.

Approx. Date	Event	Alternative Date(s) Discussed	Most likely according to the paper
ca. 1875 BC	Abraham enters Canaan (215-year theory)	—	Possible only under the 215-year theory
ca. 1919 BC	Birth of Levi (430-year chronology)	ca. 1704 BC (215-year chronology)	Depends on chronology
ca. 1875 BC	Jacob enters Egypt (430-year theory begins Egyptian sojourn)	ca. 1660 BC (215-year theory)	ca. 1875 BC (slightly favoured)
ca. 1804 BC	Death of Joseph (430-year theory)	ca. 1589 BC (215-year theory)	Depends on chronology
ca. 1667 BC	Birth of Ephraim (derived under 215-year chronology)	—	Only relevant under 215-year model
ca. 1590 BC	Earliest likely beginning of Israelite slavery (215-year model)	Much earlier under 430-year model	Uncertain
ca. 1525 BC	Birth of Moses	—	ca. 1525 BC
ca. 1445 BC	The Exodus	Popular alternative: 13th century BC (often linked with Ramesses II, roughly 1270–1250 BC)	ca. 1445 BC
ca. 1405 BC	Israel conquers territory east of Jordan / end of wilderness period	—	ca. 1405 BC
ca. 1105 BC	Jephthah's statement ("300 years") fits early Exodus chronology	—	Supports early Exodus
ca. 1040 BC	Birth of David (derived chronology)	—	ca. 1040 BC
966 BC	Fourth year of Solomon's reign; Temple construction begins	—	966 BC
930 BC	Death of Solomon	—	930 BC

Major chronological debates

Question	Date/Length 1	Date/Length 2	Paper slightly favours
Length of Israel's stay connected with Egypt	430 years entirely in Egypt	430 years total = 215 in Canaan + 215 in Egypt	430 years in Egypt (but not conclusively)
Jacob enters Egypt	1875 BC	1660 BC	1875 BC
Abraham enters Canaan	Not fixed by long-sojourn view	1875 BC	No conclusion
Date of Exodus	1445 BC	13th century BC (~1270–1250 BC)	1445 BC

Final conclusions reached by the author

Issue	Conclusion
Exodus date	ca. 1445 BC is strongly preferred.
Ramesses II Exodus	Rejected as less consistent with the biblical chronology.
430 vs 215 years	Cannot be decided with certainty.
Which is more probable?	430 years in Egypt is viewed as somewhat more realistic because of the Masoretic text and the population calculations.
Is the 215-year theory still acceptable?	Yes. The author explicitly states it remains a viable interpretation because of Paul's statement in Galatians, the Septuagint/Samaritan Pentateuch reading, and genealogical arguments.
Overall verdict	No definitive answer is possible from the available evidence; both chronologies should remain viable. 📄 Pasted text

Bottom line

If you asked for the chronology that the paper itself would most likely adopt, it would be:

- Abraham enters Canaan: *not firmly fixed* (only fixed under the 215-year model).
- Jacob** enters Egypt: ca. 1875 BC
- Israel remains in Egypt: about 430 years (slightly preferred, but not proven).
- Moses born: ca. 1525 BC
- Exodus: ca. 1445 BC
- Entry into Canaan: ca. 1405 BC
- Temple construction begins: 966 BC

The author's strongest statement is not that the long-sojourn theory is proven, but rather that **the early Exodus date (ca. 1445 BC) is much more secure than the length of the Egyptian sojourn**, which he ultimately leaves unresolved.

update the table assuming 215-year view is more likely

Assuming the **215-year sojourn in Egypt** is the preferred interpretation (the traditional Jewish view, supported by the Septuagint, Samaritan Pentateuch, Galatians 3:17, and many early Christian interpreters), the chronology becomes:

Approx. Date	Event	Alternative Date(s)	Most likely (215-year view)
ca. 1875 BC	Abraham enters Canaan (God's covenant)	Not fixed under 430-year Egyptian view	✅ ca. 1875 BC
ca. 1850 BC	Isaac born (25 years after Abraham entered Canaan)	—	✅ ca. 1850 BC
ca. 1790 BC	Jacob born (Isaac age 60)	—	✅ ca. 1790 BC
ca. 1704 BC	Levi born (derived chronology)	ca. 1919 BC	✅ ca. 1704 BC
ca. 1699 BC	Joseph born	ca. 1914 BC	✅ ca. 1699 BC
ca. 1660 BC	Jacob and his family enter Egypt	ca. 1875 BC	✅ ca. 1660 BC
ca. 1589 BC	Death of Joseph	ca. 1804 BC	✅ ca. 1589 BC
ca. 1590–1570 BC	Rise of the "new Pharaoh who did not know Joseph"; beginning of oppression	Earlier under 430-year view	✅ Shortly after Joseph's death
ca. 1525 BC	Birth of Moses	—	✅ ca. 1525 BC
ca. 1445 BC	The Exodus	13th century BC (~1270–1250 BC)	✅ ca. 1445 BC
ca. 1405 BC	Entry into Canaan / conquest begins	—	✅ ca. 1405 BC
ca. 1105 BC	Jephthah's "300 years" statement	—	✅ Fits naturally
ca. 1040 BC	Birth of David	—	✅ ca. 1040 BC
966 BC	Fourth year of Solomon; Temple construction begins	—	✅ 966 BC
930 BC	Death of Solomon	—	✅ 930 BC

Resulting timeline

Period	Length
Abraham enters Canaan → Isaac born	25 years
Isaac → Jacob	60 years
Jacob → Egypt	130 years
Time in Canaan (Abraham to Jacob entering Egypt)	215 years
Time in Egypt	215 years
Total from Abraham entering Canaan to Exodus	430 years
Exodus → Temple foundation	480 years

This chronology implies

- Abraham enters Canaan: ca. 1875 BC
- **Jacob** enters Egypt: ca. 1660 BC
- Israel remains in Egypt: 215 years
- Joseph dies: ca. 1589 BC
- Israelite oppression begins: shortly after Joseph's death (around 1590–1570 BC)
- Moses born: ca. 1525 BC
- Exodus: ca. 1445 BC
- Entry into Canaan: ca. 1405 BC
- Temple construction begins: 966 BC

This chronology has the advantage of matching:

- Paul's statement in **Galatians 3:17** that **430 years elapsed from the Abrahamic covenant to the giving of the Law**.
- The **Septuagint** and **Samaritan Pentateuch**, which read "Egypt and Canaan" in Exodus 12:40.
- The genealogies of Moses and Aaron without requiring additional missing generations.
- The long-standing traditional Jewish interpretation (typically **210–215 years in Egypt**).
